

Your solution, our job!

▶ **Find the Sprayer
that suits your needs!**

A guideline to Graco's solutions for Professional Contractors handling architectural paint & texture projects from small private to medium and large commercial job sites.

“ Very big, or very detailed. Very tough or more complex. Inside, outside, high in the air... it does not matter how your job site looks like, there is always one certainty: Graco helps you to find the solution you need. We want you to get the best result, increase your productivity and save time and money. Because that is our job. ”

Our mission is to facilitate your work on the job site, with professional units of the best quality. Also up-front we help you to select the right sprayer for your job. With the questionnaire here on the side you have a first idea, a guideline which units suits your job best.

► **What type of MATERIAL do you spray?**

► **Choose your CONFIGURATION**

EVERYDAY RELIABILITY

A standard sprayer built on proven technology that gets the job done

WORK SMARTER

High comfort and top of the line sprayer innovations that save me time and money

BEYOND JOB SITE TOUGH

The ultimate durable all terrain sprayer that can handle the toughest job site

► Fine Finish

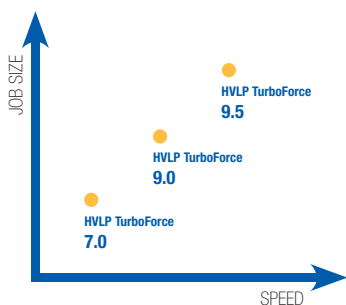

I paint:

- **SMALLER OBJECTS** that need a perfect finish
Radiators, cabinets, ...
- **SMALL OBJECTS** for maintenance or touch-up
Up to 50 m²
- **BIGGER OBJECTS** that need a good finish as well as more speed
Doors, stairwells, ...

HVLP

EasyMax FF

FinishPro II

► HVLP TurboForce™

High-volume, low-pressure (HVLP) sprayers use a high volume of air to help break-up the paint and push it into the nozzle.

An additional low-pressure air stream is transmitted through the nozzle, meeting the paint creating a fine, mist-like spray pattern. This results in a sprayer that produces minimal overspray, making it a good choice for interior or detail work.

HVLP sprayers also provide the highest level of transfer efficiency. This means more paint reaches the spraying surface, resulting in less masking and dust sheet usage.

HVLP TurboForce 9.5

► **EasyMax™ FF**

The EasyMax can be used as a maintenance gun to repaint objects, to repair walls sprayed before with a normal paint sprayer, to spray paint jobs up to maximum 50 m². The ideal tool to spray rooms with different colour walls, ceilings, (garage) doors, radiators, cabinets, carports, garden sheds, fences, staircases, furniture (new or renovation), etc...

An airless unit to spray water- and solvent based lacquers. Ideal to use for smaller objects or a second colour up to 50m² a day.

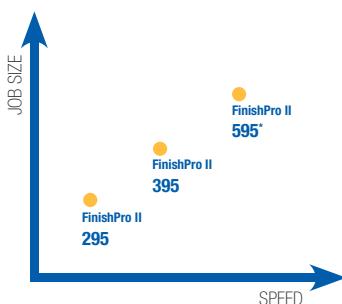

1. FINE FINISH

► **FinishPro™ II**

Some contractors claim that AAA (Air-Assisted Airless) is slower than airless, not realizing that if you turn-off the compressor on an AAA and turn up the fluid pressure, you are essentially running a 225 bar airless machine. The Air-Assist simply gives you the ability to run products efficiently in lower pressure ranges, which is desirable for fine finishes. And having a 18 liter supply capacity gives AAA a production advantage over HVLP on larger scale tasks, but with similar transfer efficiency and finish quality.

* Option to spray latex

► Professional Airless

I paint:

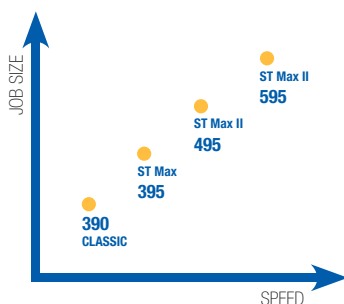

- SMALL SURFACES for maintenance or touch-up
Up to 50 m²
- Most of the time SMALLER INTERIOR JOBS
- BIGGER INTERIOR and/or EXTERIOR JOBS
- LARGE JOBS with maximal material output
See chapter Texture

EasyMax WP II

CLASSIC /
ST Max II

Ultra Max II

Mark Max

► CLASSIC - ST Max™ II

The combination of reliable performance and compact design makes the CLASSIC - ST Max range the ideal product for interior painting of small residential jobs. You can easily spray almost all interior acrylic paints, emulsions, laquers, varnishes and enamels on walls, wood and metal surfaces. The ST Max II 595 outperforms all other models and can also be used for occasional facade painting.

► **EasyMax™ WP II**

The EasyMax can be used as a maintenance gun to repaint objects, to repair walls sprayed before with a normal paint sprayer, to spray paint jobs up to maximum 50 m². The ideal tool to spray rooms with different colour walls, ceilings, (garage) doors, radiators, cabinets, carports, garden sheds, fences, staircases, furniture (new or renovation), etc...

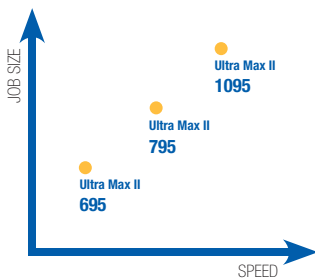

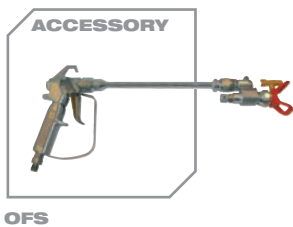

2. PROFESSIONAL AIRLESS

► **Ultra® Max II**

The Ultra Max is the ideal unit for medium to large painting jobs, inside as well as outside! Your most reliable buddy for renovations, new construction, commercial and residential buildings, exterior facades, new housing projects, etc. It handles most common tip sizes and heavier coatings with ease! The Ultra® Max sprays perfectly acrylics, primers, emulsions, waterborne as well as solvent paints.

▶ Texture

I apply:

- ▶ DECORATIVE TEXTURE for a perfect finish
Up to 4.5 mm] RTX
- ▶ PREMIXED TEXTURE decorative materials
or/and powder plaster
Up to 1 mm] T-Max
- ▶ PREMIXED PLASTER with the highest output] Mark Max

Mixing Kit

▶ T-Max™

The T-Max has been specifically designed to apply most interior plasters and fillers. Using the T-Max in combination with an external compressor, decorative plasters with particals up to 1.5 mm can also be sprayed.

The T-Max has been tested and approved to spray the most demanding plasters, mixed or premixed, that are currently on the market.

T-Max 657

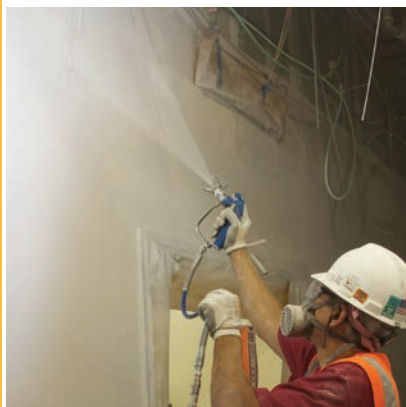

► **RTX™**

The RTX 1500 is packed with innovative features and performance points – designed for the professional texture contractor. The RTX 1500 is Graco's solution for the interior application of decorative materials. With its 57 liter hopper, the unit fits smaller to medium size projects to spray Simulated Acoustic, Drywall Mud, Elastomerics, Deck Coatings and EIFS / Synthetic Stucco materials. The RotoFlex™ HD Pump, in combination with the built-in air compressor, offers the ability to pass large aggregates without damaging them or the pump.

RTX 1500

Hopper Gun

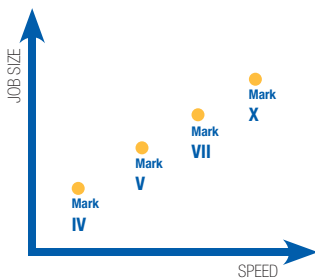

► **Mark Max**

The Mark Max is a real multiple purpose unit for large painting jobs for the inside as well as the outside! Your most reliable buddy sprays airless plasters and most common paints. The Mark Max sprays latex, emulsions, acrylics, epoxies, blockfillers, fire retardants, intumescent and most common airless plasters. It even has enough performance to deliver the necessary flow for 2 people spraying simultaneously.

Bag roller + Hopper

Mark ProContractor

Mark IronMan

▶ Heavy Duty Coatings

I apply:

- ▶ HEAVY DUTY COATINGS for repair or touch-up
- ▶ PAINT, INDUSTRIAL COATINGS and PREMIXED PLASTER with the flexibility to switch between electricity and gas driven
- ▶ HIGH OUTPUT HEAVY DUTY COATINGS (eg. water-proofing/roofing materials) with long hose lengths and freedom from electric power
- ▶ PAINT, INDUSTRIAL COATINGS and PREMIXED PLASTER with a high powered gas engine

XForce HD

DutyMax

GH Big Rigs

GMax II

XForce HD

▶ XForce™ HD

With the capability to quickly deliver a highly desired, one-coat airless finish, the XForce HD eliminates the need for multiple coats often required with messy brushes and rollers. This powerful handheld sprayer also eliminates the need to wet larger airless equipment just to spray small areas. It is the fastest way to complete small jobs and touch-up. Jobs that used to take hours to complete can now be completed in minutes – saving time, money and material.

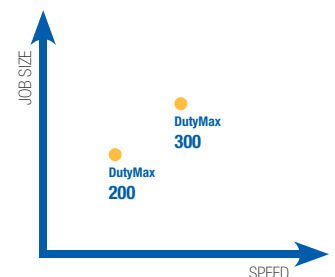

DutyMax
GH300DI

▶ DutyMax™

The DutyMax sprayers are powerful hydraulic sprayers for high production contractors spraying a wide range of materials from latex and acrylics to elastomerics on large residential and commercial jobsites. The DutyMax design has been optimized to efficiently spray the heavy duty materials such as plasters, bitumens, fire retardants and liquid roofing solutions. The DutyMax 300DI is robust, reliable and strong enough to support heavy duty jobs with heavy duty materials, even with 2 or 3 guns.

Container Suction Kit

► **GH™ Big Rigs™**

The GH sprayers are powerful hydraulic sprayers that allow you to spray a wide range of materials: from paint and airless plasters to roofing, waterproofing materials and protective coatings.

Our compact entry level sprayer GH833 is ideal for high production professional contractors. The GH933 uses maximum pressure to handle the toughest industrial coatings. Our GH 733 / 933 / 1017 / 2570 / 5040 can be customized for a wide range of applications, trading off high pressure with high flow rates.

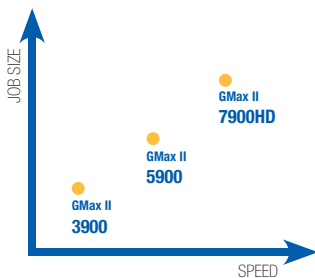

GH 933	GH 5040	GH 833	GH 733	GH 2570	GH 1017
PRESSURE				FLOW	

► **GMax™ II**

The GMax is the ideal unit to spray a full range of coatings on residential, commercial and industrial jobs. The 5900 HD and 7900 HD, handle most common tip sizes and heavier coatings with ease!

The GMax sprays perfectly acrylics, primers, emulsions, waterborne and solvent based paints. The HD version also handles most common anti-corrosive and fire retardant paints and airless plasters.

► Professional Cleaning

I'm looking for:

- ELECTRICAL
professional washer in a compact size
- GAS POWERED
ultimate performance professional washer

AquaMax-E

G-Force II

► AquaMax-E™

Both the AquaMax-E 2330 and AquaMax-E 2335 are the ideal solution for tradesmen, painters and mid-sized building firms that usually work on small industrial sites.

The AquaMax-E 3050 is the perfect choice for building contractors, mid-sized farms and garages. It offers higher pressure, flow and cleaning efficiency and a longer life pump and frame design for more intense applications.

AquaMax-E

► **G-Force™ II**

G-Force II 2532DD + G-Force II 3027DD: a light and compact washer with the power to perform.

G-Force II 3032DD + G-Force II 4040DD + G-Force II 4040DDC: a high performance washer for frequent use.

G-Force II 4040BD + G-Force II 4040BDC: a washer for the toughest cleaning and surface preparation jobs.
